Person Id	Problem	App/Website	Likes	Don't likes	Improvements	Occupation
1	Physiotherapy	Prehab	Suggests exercise programs for problems a user might have and also suggests programs for any improvements a user might need for a body part.	Does not have Yoga programs	Could make it better by including yoga. Also, could improve by adding one on one consultations with real doctors for any issue. It could also suggest some doctors or clinics which could help the patient with the problem that they might have.	Biostatistician
2	Trip Planning	TripIt	Syncs to your inbox and gets all the information from it to have your whole trip itinerary in one place so the user does not have to look into multiple apps for the trip.	Does not provide real time updates on any booking. So, in case of any booking changes a user has to go back again to the specific app to check the booking status.	It could be improved by adding real-time updates to your bookings. It could also include a built booking system so the user can book anything from the app itself. Another thing it can improve on is to allow multiple users to collaborate on a trip as often times people go on a trip in a group.	Student
3	Soccer Stats	messivsronaldo.app	Advance Stats for Messi and Ronaldo	No advance stats for other players	Could have advance stats for all other soccer players OR could have a website where it has all advance stats for other players	Student
